- **Promotion period:**

# How does The World Team 1% Bonus Promotion work

- World Team member has the ability to earn 1% on the Total Volume Earn Base Value of ALL downline Supervisors (there is no limit to the levels).
- It will work similar to Production bonus with the following blocking rules:
  - If you have a World Team below who is also eligible to earn the 1% bonus, you will earn the 1% on that World team member's Total Volume, but you will not earn on their downline supervisors since they are already earning the 1% on them. You will still earn on your other legs where you are not cut off.
  - If there is a TAB team below the qualifying World Team, you will earn the 1% on that TAB team member's Total Volume, but you will not earn on his downline supervisors. This in addition to being blocked by any World Team earning the 1% bonus. You will earn on your other legs where you are not cut off.
- The World Team 1% bonus will not be paid from your own Group Volume as this comes from your Qualifying Supervisors. The World Team 1% bonus is paid on your fully qualified Supervisor organization.

# Changes in Active World Team Promotion

- The Active World Team recognition will remain, however, the \$500 Special Bonus reward for first time non-TAB Active World Team qualifiers will be discontinued.
  - 1st time non-TAB Active World Team qualifiers who started the qualification between August 2022 and January 2023 are still eligible for the US\$500 Special Bonus if they complete all three qualification requirements within four to six consecutive months period.
